broadland digital

Creative solutions. Real results

Promote your business using our wealth of experience across the design, print and signage sectors.

broadlanddigital.co.uk

About us

Broadland Digital Limited is part of a design, print & signage group, that have been trading from its Norwich offices for over 3 decades. Over this time, we have evolved considerably to where we are today.

From our Norfolk base, we can offer a wealth of in-house services ranging from graphic design and digital print, through to bespoke signage, vehicle graphics, wraps and even spray wrapping.

We are one of the few local businesses who can manufacture and install everything under one roof.

01.1

What makes us unique

We are a very long established business with a good reputation across the print and signage sectors. The ability to produce everything in-house, sets us apart from our competitors.

01 Core services

Signage

Design and manufacture of bespoke signage, vehicle graphics and wraps, plus a specialist Race Car Graphics division.

Print

Long or short run digital and litho printing services. Using the latest technology, combined with a fast turnaround, sets us apart from others.

Design

Let's get creative with our design studio where we can create your eye catching vehicle graphics, brochures and signage visuals.

Finishing

We have a full in-house finishing department offering laminating, binding and even bespoke packaging in short runs.

02 What we do

Signage

Design and production of tray signs, wall graphics and wraps, exhibition stands, banners or even window etch, we cover it all!

Vehicle Graphics

From basic car graphics to fully wrapped vans we have it covered. We can wrap or graphic almost any type of vehicle or product.

Laser Cutting & Engraving

Cutting of an array of materials, bespoke shaped exterior signs, cut acrylic letters for 3D sign panels and engraving promotional merchandise.

Bespoke Manufacturing

Design and manufacture of beskope signage systems including fabricated totem signs and building signage.

About Signage

Signage plays a crucial role in business promotion. It is also important for event and building directions and navigation. Marketing is a key part to any company that wants to stand out from the competition but there is also just as much need for generic emergency signage and safety instructions, often found around the perimeter of sites and in public spaces. This is an area that is often overlooked but don't worry, we have you covered! Having provided signs for complex environments such as malls and hospitals, we have an extensive resource that can be customised for most locations. Promotional signs can be created to attract the attention of both existing and new customers, for both retail and industrial sectors. Combining both types of signage can ensure brand consistency as well as a cohesive and enhanced experience for visitors to your premises or site.

02.1

Building Signage

Whether you are after exterior signage to grab the attention of your customers, or interior signs to promote new services, we have you covered! With a wealth of experience in the print industry, we are confident to ensure consistency when it comes to branding. We cut vinyls, acrylics, PVC and composites on-site and can also assist with raised cut letters and wrap around hoardings.

02.2

Vehicle Graphics

One of the cheapest, most cost effective ways to advertise your business and its services.

Making use of 100's of colours and finishes or fully printable vinyl, we can design and install something eye catching for your business.

02.3

Van Wrapping

Whether you are after simple, cost effective, cut vinyl's or a printed wrap; we can assist throughout the whole process. Make your vehicle a mobile advertising billboard. We can design, print, cut and install your sign writing to cars, motorbikes, vans, buses, race cars, caravan, a full fleet of vans or even on your aeroplane; you name it & we can graphic it!

02.4

Exhibition Stands & Graphics

Exhibition stands & roller banners come in a large range of sizes and finishes. Standing out at an event or conference is extremely important, whatever the name, they are all tasked to perform the same job, advertise your business or services. Roller banners are perfect for anyone who wants a convenient, cost-effective way to advertise at events or even within the office.

02.5

Race Car Graphics

Your Race Car Graphics need to represent your business and it's sponsors. Ensuring your business stands out on the track will not only catch the eye of spectators, but also potential sponsors.

Whether you are looking for some simple graphics for your race car or a full wrap, we have the knowledge and expertise to make your vehicle stand out from the rest.

02.6

Spray Wrapping

A technique used to apply a flexible, rubber-like coating to your vehicle. Similar to plasti dip, liquid wrapping involves spraying a liquid polymer-based solution onto a surface, which dries to form a protective, peelable layer.

Spray wrapping can be laquered to provide a finish similar to that of OEM and is often a cheaper alternative to a vinyl wrap.

02.7

Large Format Printing

Large format prints and posters can be used for both indoor and outdoor signage, in A-frames, swing boards on walls or even windows in direct sunlight. As a low cost, efficient way to change promotions and messages.

With sizes available up to 1.5 metres by 50 metres as one continuous print, we're sure we can print your promotion large enough to stand out from your competition.

02.8

Bespoke Fabrication

The design and fabrication of bespoke signs widely used to create unique and specialist signage. Whether you are looking for something individual for your building or maybe a totem sign for the entrance, our specialist team can create and install something we can all be proud of.

02.9

Laser Cutting & Engraving

Enabling cutting of an array of materials, we often produce bespoke shaped exterior signs, cut acrylic letters for use on 3D sign panels and engrave promotional merchandise such as phone chargers or even wedding gifts! Giving a glass-like finish, the edge of the cut material is perfectly smooth and highly polished, giving a far more premium look and feel to that of traditional CNC'ing.

02.10

Hydro Dipping

Hydro dipping, also known as water transfer printing or hydrographics, is a technique where a decorative pattern is applied to a 3D object by dipping it into a water bath with a special film that dissolves, allowing the design to adhere to the object's surface, creating a seamless pattern on complex shapes; essentially, it's a method of "painting" an object by dipping it into a water-based ink pattern.

Simple, yet effective signage.

03 What we do

Digital Print

Fast turnaround, low volume print, perfect for those smaller jobs which are urgent or simply required in smaller batches.

Litho Print

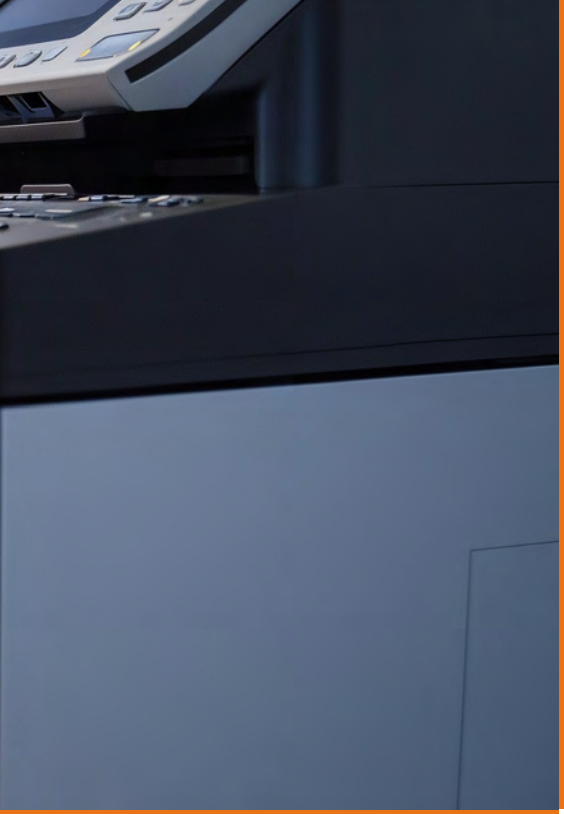

For those longer runs requiring Pantone or specialist colours, Litho is the best solution.

Print Finishing

With an array of finishing equipment we can fulfill most requirements in-house with the minimum of fuss.

Site Safety

Emergency signage and site safety is high on our list of printed material. From luminescent print to safety printed workwear.

About Print

We have offered litho and digital print services to businesses, in Norwich and surrounding areas, for the last 30 years. Starting as a reprographics company, we utilised our vast knowledge of colour and computers to gradually develop into a thriving business.

Several years ago, we were well placed to take advantage of the advent of digital and have continued to expand that area of the business. Digital print has many advantages over conventional, the main ones being, short runs, quick turnarounds and the facility to personalise print.

03.1

Digital Print

Our digital print department includes the latest equipment. Whether you're looking for promotional flyers, brochures, leaflets or posters, we can help. Our expertise also extends to digital booklets, business cards and labels. With a fast turnaround service we can often print and dispatch, same day!

03.2

Litho Print

We have been providing litho printing to our customers now for over 20 years. Our litho printing process involves using the latest technology to produce high-quality prints. We provide a wide range of services from booklets and leaflets, postcards and flyers through to brochures, stationery and packaging.

03.3

Site Safety

Looking for printed site safety? Well look no further than Broadland Digital. We can provide a range of printed site safety garments and printed literature for your business. Whether you require hi-vis jackets, helmets or emergency signage, we can design and print your requirements, quickly and efficiently.

03.4

Print Finishing

Do you need a professional print finisher? We have the equipment to handle all of your needs.

With everything from saddle stitch finishers, laminators, foil blocking, laser cutting and perfect binding, we can produce the highest quality finish to your project. With the new addition of a high specification cutter which allows us to produce low volume packaging or anything which is an unusal shape, without the need for die cutting.
